From the Bridge...

Stephen Middleton, Commodore

Good News! We are passing the halfway point of the "off-season". The days are getting longer and we are, give or take a few days, closer to the 2015 launch than the 2014 haul-out. But it is so cold out there. Those who didn't migrate to warmer climes when the leaves turned, or at least put the plans in place for a getaway, are probably thinking more and more about making a break for it. Personally, the last minute offers are looking better every day.

On the other hand, even though it is still the "dead of winter", we are actually getting into a very busy period for the volunteers on the executive. This is the time of year when the planning is done and arrangements for next season put in place. We have a budget to construct, cruises to arrange, social events and club races to plan, and your memberships renewals are coming in (don't forget the new March 31, 2015, deadline, membership forms are available on the web site). The objective is to have everything lined up for a great season before we all get busy preparing for launch. And speaking of social events, don't forget the Outdoor Day coming up on February 8th. See page 5 for the details.

If you have downloaded your membership form you will have noticed the section for volunteers is a little different. Rather than ask for commitment to specific dates or events (we know it is hard to commit this far ahead), we are asking you to indicate the areas in which you can help out. One of the options is Club Cruise Captain. In the last issue, I wrote about the success of the club-sponsored dinners that were included in some of last season's cruises. This year the dinners will be offered for all cruises, provided we have a volunteer cruise captain for each of them. Ann and I took on this role a few times last year and the main question we had going into the first cruise was, "So what does the cruise captain do anyway?"

The Cruise Captain coordinates and gets the provisions for the pre-cruise breakfast and the club dinner. Involvement typically kicks-off the week before the event. By that point the sign-up is complete and the FPYC Cruising Directors have exchanged participating boat lists with the reciprocal club. The numbers can change a little in the final days, but for planning purposes, you will know how many people will need to be fed.

We found that a mixed grill menu was a great way to cover all the bases. Combinations on the various cruises included chicken, pork tenderloin, sausages, flank steak and, on the largest of the cruises, roast beef. Thursday or Friday were the shopping days. In addition to the meat we picked up foil roasting pans, BBQ sauces, and depending on how we were doing against the budget, perhaps a couple of contributions to the pre-dinner appetizers.

A pre-cruise meeting is usually scheduled for 8 am on the Saturday morning. In addition to coffee, (fixings are stored in the D-Dock shelter), we would pick up breakfast provisions (rolls, jam, cream cheese, fruit tray) at the Super Store.

At the meeting, the Cruise Captain shares any instructions or other information from the host club (calling-in on arrival, dock assignments, if available, and so on), distributes the cruise list, arranges for the food transport (boats, especially sail boats, don't usually have enough fridge space for everything), assigns a radio channel for the cruise and gets agreement on a fleet departure time for those planning to travel together.

...continued

From The Bridge - Continued

On arrival the Captain checks with the Dock Master or Officer of the Day to make sure everything has gone according to plan with slip assignments etc, and to determine where the group can get together for the dinner. Communicating where and when to assemble for dinner gives you a great opportunity to walk the docks and chat with everyone on the cruise. Just so long as you resist the temptation to have a drink at every boat, the rest of the duties are easy. The actual dinner itself, the set-up, cooking, eating, clean-up etc., is really the fun part and requires only minimal coordination - sailors are amazingly resourceful and self-organizing when it comes to getting fed!

So there you have it. It feels like it took longer to write it down than to actually get it done. We tend just to remember the last bit with the food, drinks and camaraderie. I strongly recommend giving Cruise Captain a try. I'm sure you'll have a great time.

Stephen

OUTDOOR DAY

CELEBRATE WINTER!

Come out and bring your family to Outdoor Day at Fifty Point.

When? Sunday, February 8, 2015, from 1:30 to 4:00 p.m.

Where? Fifty Point Conservation Area, register for activities at Ingledale House

Come outside in the brisk, fresh winter air at Fifty Point to enjoy outdoor activities with your boating friends and family...

Weather conditions will dictate many of the activities. Bring your ice skates, snowshoes and cross-country skis. As well, bring your GPS, cell phones and iPads and creativity for some of the following:

- * Geocaching - experience not necessary, instructions will be provided, although a GPS or cell phone will be needed
- * Scavenger hunt - bring your camera, cell phone or iPad
- * Snow sculptures - if no snow make a sculpture or work of art from materials from the forest, or make a forest sculpture instead
- * Wagon rides will be available for everyone and also to shuttle Geocachers to the designated park area.

Register for the activities at Ingledale House as some events are only during specific times. Also, remember to bring your 2015 FPYC registration form.

Light refreshments will be available at Ingledale House.

Race Report - February 2015

By Garry Cooke

World Sailing Events:

The VOLVO Ocean race is on its way towards China, but the team that grounded last month will be out of the race for while. Team Vestas Wind have salvaged the boat and are planning to rebuild it to re-enter the race when the fleet get back to North America. More info at website www.volvooceanrace.com.

Another interesting race at the moment is the around the world, Barcelona World Race. This race is a double handed race, and they are now in the south Atlantic approaching the “Roaring 40’s”. The leading boat ‘Hugo Boss’, suffered a dismasting, and is motoring to Brazil. Check out the website for details.

<http://www.barcelonaworldrace.org/>

Pub Nights:

The pub night in January was well attended, as we listened to Ron Ouwehand provide an account of his three month trip down the St.Lawrence in his boat ‘Old Hand’. Thankyou Ron.

The evening was a good social event to catch-up with acquaintances from the club, and also to have some entertainment.

We will try and run another pub night on **Tuesday, March 3rd** so keep the date open in your social calendar. (keep checking the website for details)

Garry Cooke

Hello everyone. My name is Lise Denison, the new secretary for FPYC Executive. My husband Stephen (Steve) and I have the 41 ft Dufour GibSea sailboat "GaYa" on J9 dock.

We got married December 25, 2002. I have twin daughters, Natalie and Nicole and Steve has a son named Tom who lives in Toronto. Natalie, lives in New Jersey as an Athletic Trainer and Beachbody Coach and Nicole and her husband live in Florida with our two grandchildren, Lyla who is 4.5 and Parker is 2.5 years old. We make sure to go visit them at least a couple of times a year. Thank goodness for FaceTime!

Steve has at least 50 years of sailing and 7 years of extensive offshore blue water racing. I have experience sailing on Lake Erie and Ontario, for the past 30 years. We came to Fifty Point in 2008 when we purchased a 35 ft Hughes and then purchased the GaYa in 2012. Our plan is to get her equipped for our long journey to the Caribbean in 2016 when Steve retires. We have made several trips to Thousand Islands the past couple of years.

I have been retired since 2008 from Canadian Tire Financial Services as a Trainer. During my retirement, I keep busy exercising (healthy living is important to me), taking care of our seniors and travelling a lot with Steve's work. I like adventuring in many types of hobbies and am never bored.

Being part of the Fifty Point Yacht Club has given us the opportunity to meet great people. Until we leave for the Caribbean, I will ensure to do my best in my secretarial role.

I look forward working alongside with Stephen, Jayne, Brian, Sue, Geri, Dave, Chris, Mike, Garry and Cindy.

Happy Boating season

Lise Denison

EASY CHEESY BUFFALO DIP

INGREDIENTS

1 tub (250g) Philadelphia cream cheese spread
1/2 cup Kraft Rancher's Choice Dressing
1/2 cup hot pepper sauce
1 cup cooked chicken finely chopped
1/2 cup mozzarella shredded cheese

INSTRUCTIONS

Heat oven – 350
Mix first 3 ingredients in medium bowl until blended
Add chicken and cheese, mix well
Spoon into 1 litre shallow baking dish
Bake 20 mins or until heated through
Stir before serving

Serve with celery, carrot sticks, crackers, French bread

Can also be made in a slow cooker:

Combine all ingredients, cover with lid and cook on low heat at least 1 1/2 hours.

Wind, Weather and Waves

By Doug Nixon

Jet Streams

Jet streams are fast flowing, narrow air currents found in the atmosphere of some planets, including Earth. The main jet streams are located near the altitude of the tropopause, the transition between the troposphere and the stratosphere (where temperature increases with altitude) The major jet streams on Earth are westerly winds (flowing west to east). Their paths typically have a meandering shape; jet streams may start, stop, split into two or more parts, combine into one stream, or flow in various directions including the opposite direction of most of the jet.

The strongest jet streams are the **polar jets**, at around 7–12 km (23,000–39,000 ft) above sea level, and the higher and somewhat weaker **subtropical jets** at around 10–16 km (33,000–52,000 ft). The Northern Hemisphere and the Southern Hemisphere each have both a polar jet and a subtropical jet. The northern hemisphere polar jet flows over the middle to northern latitudes of North America, Europe, and Asia and their intervening oceans, while the southern hemisphere polar jet mostly circles Antarctica all year round.

Jet streams are caused by a combination of a planet's rotation on its axis and atmospheric heating (by solar radiation and, on some planets other than Earth, internal heat). Jet streams form near boundaries of adjacent air masses with significant differences in temperature, such as the polar region and the warmer air towards the equator.

Other jet streams also exist. During the Northern Hemisphere summer, easterly jets can form in tropical regions, typically in a region where dry air encounters more humid air at high altitudes. Low-level jets also are typical of various regions such as the central United States.

Meteorologists use the location of some of the jet streams as an aid in weather forecasting and many other things. The main commercial relevance of the jet streams is in air travel, as flight time can be dramatically affected by either flying with the flow or against the flow of a jet stream. Clear-air turbulence, a potential hazard to aircraft passenger safety, is often found in a jet stream's vicinity, but it does not create a substantial alteration on flight times

The polar jet stream can travel at speeds greater than 100 miles per hour (160 km/h). Here, the fastest winds are colored red; slower winds are blue.

,,,continued

Jet Streams

Clouds along a jet stream over Canada.

Jet streams flow from west to east in the upper portion of the troposphere.
